# Taxable Sales In California (Sales & Use Tax)

2009 Fourth Quarter

Taxable Sales in California is a quarterly report on retail sales activity in California, as measured by transactions subject to sales and use tax. The report includes data about statewide taxable sales by type of business as well as data about taxable sales in all California cities and counties.

The following factors should be considered when using these data:

- 1. Total taxable transactions do not necessarily indicate the gross sales of stores dealing in taxable items. Only sales subject to sales or use tax are tabulated; excluded are sales for resale, sales of nontaxable items such as food for home consumption and prescription medicines, and taxable sales disclosed by Board audits.
- 2. Some businesses dealing primarily in nontaxable activities, such as services, manufacturing, contracting, or wholesaling, either sell some merchandise that is subject to sales tax or use some items that were purchased ex-tax and on which use tax must be paid. Such transactions are included in the tabulations.
- 3. Data are compiled by type of store but cannot be broken down by commodity.
- 4. Businesses are classified according to their principal line of merchandise or service.

Readers are invited to submit comments and suggestions designed to improve this publication to:

## TAXABLE SALES IN CALIFORNIA

## FOURTH QUARTER 2009

Taxable sales in California declined for the 10<sup>th</sup> consecutive quarter; however, the decline is less steep than during the depths of the recent recession. Fourth quarter 2009 taxable sales totaled \$120.4 billion, \$7.5 billon less than the fourth quarter of 2008 (a decline of 5.9 percent).

Both the Southern California counties and those in the San Francisco Bay Area fared slightly better than the statewide total, as each region declined by 5.6 percent on a year-over-year basis. Conversely, the decline in Central Valley counties exceeded the statewide total. For instance, taxable sales in San Joaquin Valley counties declined by 8.2 percent, while those in

the Sacramento Area declined by 6.1 percent. Overall, 51 counties showed a decline in year-to-year taxable sales.

In constant dollar terms, statewide taxable sales decreased by 7.5 percent over the same quarter a year ago. The California Taxable Sales Deflator increased by 1.7 percent for the fourth quarter of 2009. In comparison, the California CPI declined by 1.2 percent.

While taxable sales declined by 5.9 percent during the fourth quarter of 2009, personal income declined by 1.4 percent.

## **Notice**

In early 2007 the Board of Equalization began a process of converting business codes of sales and use tax permit holders to North American Industry Classification System (NAICS) codes. This process is now complete; over one million permit holders were converted from the previous business coding system to the NAICS codes. Beginning in 2009, our reports summarize taxable sales and permits using the NAICS codes. As a result of the coding change, however, industry-level data for 2009 are not comparable to that of prior years. Therefore, we will not publish year-over year percentage changes by industry until 2010.

<sup>#</sup> Sales omitted because their publication would result in the disclosure of confidential information. In Table 6, these are included with "Total Outlets, Taxable Transactions".

#### **FOOTNOTES**

#### Notes concerning permits:

A sales tax permit is required for each place of business operated by all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in nontaxable commodities. Permits are tabulated twice a year: as of January 1 and July 1.

a/ Per capita taxable sales were derived by dividing fourth quarter self-assessed taxable sales by the population estimates of the State Department of Finance for January 1. The populations used were 38,255,508 for 2009 and 38,648,090 for 2010.

b/ Some permittees, by the nature of their business, are not required to allocate local sales or use tax to specific local jurisdictions. Their taxable transactions are listed under the column headed "Unallocated" in Table 2. Contractors and manufacturers generate most of the countywide unallocable transactions through construction work and making installations of manufactured products in the various counties. Unallocated taxable sales are not reported in Tables 5 and 6.
